

VOIZEX

● TRANSLATION

● SILENT SPEECH

● ON-DEVICE AI

● FUTURE OF COMMUNICATION

”In 50 years, the technology around us will feel like magic. But will the way we talk to each other really stay the same? The virtual world is already seamless: payments happen on their own, search answers before the question’s finished. The physical world hasn’t caught up: saying something to the person nearby still means reaching for a phone. VOIZEX closes that gap. A device you wear as if you knew another language. Technology made for the human: no screen between you, no interruption to a natural conversation.”

A phone stands between two people.

●
AI ALREADY UNDERSTANDS
LANGUAGE.

PEOPLE STILL NEED A PHONE
TO TALK TO EACH OTHER.

●
PHONE
EARBUDS
TRANSLATOR
A BROKEN CONVERSATION

●
THE TECHNOLOGY
IS READY TO MAKE

HUMAN CONVERSATION
SEAMLESS AGAIN.

●
EVERY EXISTING
SOLUTION
STANDS BETWEEN
TWO PEOPLE.

VOIZEX

PUT ON A SET OF
SMART JEWELRY.

PUT ON ANOTHER
LANGUAGE.

OR GIVE YOUR
THOUGHTS A VOICE.

Whisper, LLM Llama

● AI. LANGUAGE RECOGNITION & TRANSLATION

Clone voice

● YOUR OWN VOICE IN ANY LANGUAGE

On-device AI

● WORKS LOCALLY ON-DEVICE

EMG

● READS SPEECH MUSCLE SIGNALS

● NO PHONE.

● NO CLOUD.

● NO CHANGE TO HOW YOU COMMUNICATE.

● TWO STAGES

Translator

Natural dialogue

● A NEW WAY FOR HUMANS
TO INTERACT WITH TECHNOLOGY.

● REAL CONVERSATIONS.
AS IF YOU SPOKE EVERY LANGUAGE.

Silent speech

Human-AI Interface

● WE START WITH TRANSLATION.
WE END WITH A NEW HUMAN INTERFACE.

● MUSCLE-BASED SILENT SPEECH
RECOGNITION TURNED INTO NATURAL VOICE.

VOIZEX. SMART DEVICE.

● JEWELRY FORM FACTOR

- PRINCIPLE VALIDATED: NECK-WORN EMG DECODES SILENT SPEECH ON-DEVICE.
ETH ZÜRICH, IEEE SENSORS 2025 | SDSU, MDPI SENSORS 2025

01 NECKLACE

Catches the wearer's voice through contact at the neck, quiet and steady even in noise. Speaks the translation aloud in the wearer's cloned voice. Carries the sensing layer that opens the path to silent speech.

● VOICE CAPTURE | EMG

02 EAR CLIP

A microphone catches the other person's speech, and the translation reaches the wearer through bone conduction, leaving the ear open. The other person speaks as usual, with no extra device.

● BONE CONDUCTION

03 SMART CASE

Inside run the computations, translation, and processing of voice and muscle signals. The pieces charge and rest here too. All data processing stays within the device.

● CHARGING | ON-DEVICE AI | UV-C

● VOIZEX SET

EMG NECKLACE

Captures silent EMG signals and your voice. Speaks with your cloned voice in any language.

EAR CLIP

Captures the other person's speech. Translates it directly into your ear.

SMART CASE

AI processing, translation, charging, storage, and sterilization.

MATERIALS

Titanium | medical silicone
Gold | platinum

● VOIZEX SET

THE MOMENT

No phone on the table. No app to open before she can speak.

THE CONVERSATION

He hears her in his language. She hears him in hers. Both voices stay their own.

THE ONLY SIGN

A quiet line of titanium at the neck — everything else is invisible.

NEXT STAGES

More device formats.
More clip options.
More personalization.

SILENT SPEECH

● NOW IS THE TIME

People already want silent communication.

The technology is finally ready.

● MARKET

\$168B voice interface market

Projected to reach **\$1.58T** by 2035

SILENT SPEECH

USE CASE

● VOICE OUTPUT

The wearer articulates with the muscles, no sound, and the cloned voice comes out through the speaker in the chosen language.

● SOUNDLESS DIALOGUE

The wearer articulates with the muscles, and a connected partner hears it through an earpiece in the chosen language.

● SPEECHLESS COMMANDS

The wearer articulates a command, and paired devices or systems carry it out.

● NOISY ENVIRONMENT

● CONTROL WITHOUT SPEECH

● MEDICINE

● FACTORIES | SHOP FLOORS

● SMART HOME | DEVICES

● LOSS OF VOICE

	VOIZEX	TRANSLATION APPS	EARBUDS	SILENT-SPEECH ALTEREGO

GO-TO-MARKET

● MODEL: B2B | B2C | B2B2C | SUBSCRIPTION

01 Hospitality

Hotels, yacht and jet crews, household UHNW, concierge firms. Contact with a foreign guest, every day, face to face.

02 Private clinics

A daily flow of foreign patients. Staff and patient one on one, with no third party.

03 Negotiations

Cross-border deals and sales, delegations, summits, talks. Both sides speak directly.

WE START IN B2B AND LUXURY. AS UNIT COST FALLS, WE MOVE INTO DIRECT-TO-CONSUMER AND MASS-MARKET CHANNELS.
